Critical Paths:

The following paths identify the longest paths of tasks dependant on another task.

PUR-56, PUR-55 → PUR-7 → PUR-57, PUR-58 → PUR-6

PUR-56, PUR-55 → PUR-7 → PUR-59, PUR-60 → PUR-18

Staying on Schedule:

To keep the sprint on schedule, we implemented the following strategies:

- **Regular Stand-ups:** Daily stand-ups on Slack to track progress and address blockers, as well as a weekly in-person meeting.
- **Task Prioritization:** Prioritizing critical path tasks to ensure they are completed first.
- **Time Management:** Allocating time efficiently and setting realistic deadlines.
- **Collaboration:** Encouraging team collaboration and open communication to resolve issues quickly through availability for Discord calls if issues arise.
- **Progress Tracking:** Using tracking all tickets on Jira updating the progress as soon as it changes.

Issues with the schedule:

There were no issues with the sprint schedule and all tasks were completed on time.
